## **TOPLINE HK 270/270** High Pressure Metering Machine

| Location                                 | BU North America (Pittsburgh)             |
|--|---|
| Number of components                     | 2   |
| Mixhead type/size                        | MT 12-2                                   |
| Mixhead injector type/size               | Constant pressure injectors               |
| Controls                                 | Allen Bradley                             |
| Max. total output (pumps)  <br>A:B = 1:1 | 540 cm³/s (8,6 gal/m)                     |
| Max. total output (mixhead)              | 300 cm³/s                                 |
| Max. processing temperature              | 122°F (50°C)                              |
| Work tank capacity                       | 250 I (66,04 gal) each                    |
| Main applications                        | Covers the most demanding PU applications |
| Operating time                           | 0 hours (new)                             |
| Voltage                                  | 480 VAC                                   |
| Full load amps                           | 59 A                                      |
| Pressure vessel directive(s)             | ASME                                      |
| Equipment (extracts)                     | Mixhed pendant, closed loop control       |
| Available from                           | SOLD                                      |
